INDIAN METALS INDUSTRY – SHAPING THE NEXT DECADE

India of today is one of the fastest growing economies in the world, with consistent and impressive GDP growths for the last few years and the predictions by well known policy planners and economists is that India may surpass that of China very soon. Thus the 'Asian Drama' has well begun.

With massive investments in infrastructure, construction, power, telecom, automobiles, manufacturing, nuclear energy etc., the demand for steel, non ferrous metals, nuclear materials and emerging nano materials etc., is likely to see quantum jump growths in the coming years. And the forthcoming conference will deliberate on the current and future demand, supply, production capacities, foreign trade, raw material constraints, infrastructural bottlenecks, R&D, Sustainable Development, new materials and technologies etc., in the areas of metals, minerals and materials engineering and the conference has to come out with appropriate actions and strategies to make India a global economic power house. The conference will witness very thought-provoking and informative presentations by global and Indian experts, CEOs, policy planners and top notch scientists. The Panel Discussion Session is expected to come out with a set of concrete, blue print and action plan. So that India truly shapes the next decade and shows the way forward in metals and materials disciplines.

THE INDIAN INSTITUTE OF METALS

The Indian Institute of Metals (IIM) – 64 years old - aims to promote and advance the study and practice of the science, design, engineering and technology concerned with minerals, metals, materials and their applications. With a membership base exceeding 10000 and through a network of 52 chapters, IIM tries to realize these objectives through publications, seminars, workshops etc., IIM is always pleased to provide meaningful forums and opportunities for exchange, dissemination of information and technology innovations among industry professionals, researchers, teachers, students etc., the forthcoming event is one more opportunity for all the stakeholders in the metals and materials sectors to deliberate on the theme of the conference.
